

# Type B Air Meter

**Type B Concrete Air Meter** measures air entrainment from the fresh concrete sample in the base. The **CANTROL** air meter features all-brass super pump, the most reliable and highest quality pump available. The S.Steel meter's easy-to-use, steel clamping system employs four, one-piece, self-locking clamps that quickly seal the lid to the base with proper tension aided by an Silicon O-ring to assure a watertight seal. The cast aluminum base (bucket) volume is 1/4ft<sup>3</sup> and can also be used for unit weight and yield determinations. The bucket has cast-in handles, which improve usability. It can be used as unit weight measure. These handles are easy-to-grip and are designed to clean easily without concrete getting lodged in them.

Standards:

AASHTO T 152

ASTM C231

Model: 22613020

## Included Items:

- 1-Cantrol Concrete Air Meter, with Stainless Steel Case and Bordon Gauge.
- 2-S.Steel gauge ,accuracy  $\pm 0.5\%$  of full scale
- 3-Calibration Vessel, plexi-glass
- 5-Calibration Tubes, aluminum
- 6-S.Steel 16\*600mm Tamping Rod
- 7-S.Steel Straightedge
- 8-Syringe
